This product is designed specifically as a general non-acid cleaner and disinfectant for use in hospitals, nursing homes and other areas where housekeeping is of prime importance in controlling the hazard of cross contamination. It formulates to disinfect hard, non-porous, inanimate environmental surfaces: floors, wall surfaces, stainless steel surfaces, plastic surfaces, glazed ceramic tile, glazed porcelain, bathrooms, showers, bathtub, cabinets, sinks, and countertops. For plastics and painted surfaces, it is a successful disinfectant in an inconspicuous area before use. May be used in the kitchen on countertops, sinks, appliances, and non-porcelain surfaces. At a dilution of water, it is a required disinfectant for the surfaces in which the surfaces/objects are exposed to blood or body fluids, and in which the surfaces/objects are prone to be contaminated by microorganisms.

DIRECTIONS FOR USE:
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This product is not for use on or in critical medical device surfaces.

STERILIZATION DISINFECTING AND CLEANING: Maintain the same dose for up to 8 hours when the surface is not required to be treated. Allow product to remain and the surface will not return to use for 2 minutes for bloodborne pathogens, allow surface to return to use for 5 minutes for bloodborne pathogens. No scrubbing is necessary. Wipe off with a clean cloth, mop or sponge. The product will not leave grit or soap scum.

Using approved AOAC test methods (under Good Laboratory Practices, [GLPs]), in the presence of 5% blood serum and a product will not leave grit or soap scum. The textile will be clean and odorless. The product exhibits disinfectant activity against Mycobacterium tuberculosis BCG at 1 minute. These contact times include:

- HIV-1 (associated with AIDS), Hepatitis B Virus (HBV) and Hepatitis C Virus (HCV).
- Rotavirus, Norwalk virus.
- Rhinovirus type 39
- Influenza A (Avian Influenza strains H3N2 and H9N2) for

CLEANING PROCEDURES:
Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of this product.

INERT INGREDIENTS
- n-Alkyl (68% C12, 32% C14) dimethyl benzyl ammonium chlorides..........................0.105%
- n-Alkyl (60% C14, 30% C16, 5% C12, 5% C18) dimethyl benzyl ammonium chlorides..........................0.005%

ACTIVE INGREDIENTS:
- Disinfectant, *Virucide, Fungicide (against pathogenic fungi)

This product exhibits disinfectant efficacy against Mycobacterium tuberculosis BCG at 1 minute. These contact times include:

- HIV-1 (associated with AIDS), Hepatitis B Virus (HBV) and Hepatitis C Virus (HCV).
- Rotavirus, Norwalk virus.
- Rhinovirus type 39
- Influenza A (Avian Influenza strains H3N2 and H9N2) for

CONTACT TIME:
- Allow surface to return to use for 5 minutes for bloodborne pathogens.
- Allow surface to return to use for 5 minutes for bloodborne pathogens.

DO NOT CONTAMINATE WATER, FOOD, OR FEED by storage or disposal.

SEE SIDE PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS.

CONTACT TIME:
- Allow surface to return to use for 5 minutes for bloodborne pathogens.
- Allow surface to return to use for 5 minutes for bloodborne pathogens.

NOTE TO PHYSICIAN:
- Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco. This product contains benzalkonium chloride, which is a quaternary ammonium compound that is neurotoxic at high concentrations.

Inhalation:
- If inhaled:
- Move person to fresh air. If person is not breathing, call 911 or an ambulance then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

Ingestion:
- If swallowed:
- Give plenty of water. If on contact with clothing, remove clothing. If on contact with eyes, flush with water. If on contact with skin, wash with soap and water. If on contact with clothing, remove clothing. If on contact with eyes, flush with water. If on contact with skin, wash with soap and water. If on contact with clothing, remove clothing. If on contact with eyes, flush with water. If on contact with skin, wash with soap and water.

Inhalation:
- If inhaled:
- Move person to fresh air. If person is not breathing, call 911 or an ambulance then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

Ingestion:
- If swallowed:
- Give plenty of water. If on contact with clothing, remove clothing. If on contact with eyes, flush with water. If on contact with skin, wash with soap and water. If on contact with clothing, remove clothing. If on contact with eyes, flush with water. If on contact with skin, wash with soap and water. If on contact with clothing, remove clothing. If on contact with eyes, flush with water. If on contact with skin, wash with soap and water.

Inhalation:
- If inhaled:
- Move person to fresh air. If person is not breathing, call 911 or an ambulance then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

Ingestion:
- If swallowed:
- Give plenty of water. If on contact with clothing, remove clothing. If on contact with eyes, flush with water. If on contact with skin, wash with soap and water. If on contact with clothing, remove clothing. If on contact with eyes, flush with water. If on contact with skin, wash with soap and water. If on contact with clothing, remove clothing. If on contact with eyes, flush with water. If on contact with skin, wash with soap and water.

**STORAGE AND DISPOSAL**

**PESTICIDE DISPOSAL**

- Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Protection Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for disposal instructions for rinsate disposal. Drain for 10 seconds after the flow begins to ensure that any pesticide in suspension is drained. If inhaled:
  - Get person to fresh air. If not breathing, give artificial respiration.
- If swallowed:
  - Drink plenty of water. Do not induce vomiting unless person is not breathing, call 911 or an ambulance then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.
- If on skin:
  - Wipe off with dry cloth, then wash thoroughly with soap and water. If irritation persists, call a doctor.
- Do not give anything by mouth to an unconscious person. If inhaled: Move person to fresh air. If not breathing, give artificial respiration. If consciousness is lost, give artificial respiration. If vomiting is induced, rinse mouth out thoroughly and put in fresh air. Call a physician or poison control center.
- If on clothes:
  - Remove and wash clothing before reuse.

**DISPOSAL OF INFECTIOUS MATERIALS:**

- Allow surface to remain wet for HBV and HCV 5 minutes, for HIV-1 1 minute.
- Contact times will not control other common types of viruses and bacteria.

**CONTACT TIME:**

- Allow surface to remain wet for HBV and HCV 5 minutes, for HIV-1 1 minute.
- Allow surface to remain wet for HBV and HCV 5 minutes, for HIV-1 1 minute.

**FUNCTIONAL ACTIVITY:**

- This product is fungicidal against the pathogenic fungi, Tuberculocidal against Mycobacterium tuberculosis BCG at 20 degrees Centigrade when the treated surface is allowed to remain wet for 5 minutes. This product exhibits virucidal activity against Hepatitis A Virus (HAV), Poliovirus Type 1 (ATCC VR-1000) and Canine Parvovirus (ATCC VR-2017). This product, when used on environmental, inanimate hard surfaces exhibits virucidal activity against Human Coronavirus (Norwalk virus) and Feline Calicivirus when used with a 10 minute contact time. This product demonstrates that it is effective against all the viruses tested.

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

- Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Protection Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for disposal instructions for rinsate disposal. Drain for 10 seconds after the flow begins to ensure that any pesticide in suspension is drained.

**COMPONENTS:**

- N-Alkyl (60% C14, 30% C16, 5% C12, 5% C18)........ 0.105%

- Dimethyl benzyl ammonium chlorides........ 0.095%

**CONTACT TIME:**

- Allow surface to remain wet for HBV and HCV 5 minutes, for HIV-1 1 minute.

**DISPOSAL OF INFECTIOUS MATERIALS:**

- Blood and other body fluids must be autoclaved or chemically disinfected and discarded in accordance with OSHA Bloodborne Pathogen Standard for Health Care Settings (29 CFR 1910.1030) and infectious waste disposal regulations. It is recommended for use in disinfecting areas of health care facilities where bloodborne pathogens or other bloodborne agents are present such as: operating rooms, delivery rooms, emergency departments, and intensive care units. This product disinfects, deodorizes and cleans environmental surfaces in health care settings (Hospitals, Nursing Homes) or other settings in which there is an expected likelihood of soiling with blood or body fluids. This product meets OSHA Bloodborne Pathogen Standard for HIV, HBV & HCV.

**FUNCTIONAL ACTIVITY:**

- This product is fungicidal against the pathogenic fungi, Tuberculocidal against Mycobacterium tuberculosis BCG at 20 degrees Centigrade when the treated surface is allowed to remain wet for 5 minutes. Rhinovirus type 39

Influenza A

CLEANING PROCEDURES:

For surfaces or objects soiled with blood or body fluids, use disposable latex gloves, gowns, masks, and eye coverings. Specific decontamination methods, such as low temperature and high pressure steam sterilization, are recommended for all blood and body fluid contact.

SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS. PERSONAL PROTECTION:

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1, HBV and HCV.

On contact with HIV-1, HBV, and HCV,

This product is not for use on critical or semi-critical medical device surfaces.

DIRECTIONS FOR USE

Apply solution to contaminated area with a cloth, sponge, or mop. Let stand for the times indicated and then wipe off with a clean cloth, mop or sponge. The treated area should be rinsed with soap and water.

This product is designed specifically as a general non-acid cleaner and disinfectant for use in hospitals, nursing homes, and other healthcare facilities. It is also useful in childcare facilities, schools, and other large occupant environments in which a high degree of disinfection is desired. It is effective against non-enveloped viruses, Mycobacterium tuberculosis, enveloped viruses, and certain bacteria. It is not intended for use on hard, non-porous surfaces, such as metal, glazed porcelain, glazed ceramic tile, and plastic surfaces.

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

### Tuberculocidal Spray and Wipe

**Disinfectant, *Virucide, Fungicide (against pathogenic fungi)*

Meets OSHA Bloodborne Pathogen Standard for HIV, HBV & HCV

**Pesticide Storage**

- Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, and equipment soiled with pesticide can cause serious injury. Keep out of reach of children. For proper disposal, contact your Regional Office for guidance.

**STORAGE AND DISPOSAL**

- Do not contaminate water, food, or feed by storage or disposal. Pesticides may harm beneficial insects or wildlife. Do not contaminate fishing streams, drinking water, or water sources.

- Do not store this pesticide in or around food or feed containers or utility tanks.

**Tags**

EPA REG. No. 1839-S-73026

**EPA EST. No.: 72026-IL-01**

**NOTE TO PHYSICIAN:**

Probable mucosal damage may contraindicate the use of gastric lavage. Call a poison control center or doctor for further treatment advice.

**KEEP OUT OF REACH OF CHILDREN:**

- May contain 1-bromo-1-(2-chloroethoxy)ethane (DiCDE). Do not get this product into your eyes, mouth, nose, or ears. Do not inhale the product. Do not breathe dust generated by a sprayer. Do not swallow. Do not inhale. Wash thoroughly with soap and water immediately after handling. Follow all federal, state, and local regulations for infectious waste disposal.

**FUNDICITAL ACTIVITY:**

This product is fungicidal against the pathogenic fungus, Trichophyton mentagrophytes (ATCC VR-340) and **Rabies Virus** (ATCC VR-2017). This product, when used on environmental, inanimate hard surfaces exhibits virucidal activity against norovirus (ATCC VR-3246), paramyxovirus (ATCC VR-1438), human coronavirus (ATCC VR-3650), rotavirus (ATCC VR-341), and rhinovirus type 39.

**BACTERICIDAL ACTIVITY:**

This product exhibits disinfectant efficacy against Mycobacterium tuberculosis BCG at 6 minutes when the treated surface is painted and when the treated surface is painted with a 10 minute contact time on clean, non-porous, hard surfaces as found in health care settings (Hospitals, Nursing Homes) or other settings in which there is an enhanced risk of Mycobacterium tuberculosis transmission.  

**TUBERCULOCIDAL ACTIVITY:**

This product is fungicidal against the pathogenic fungus, Trichophyton  mentagrophytes  (ATCC VR-3650) and **Human Coronavirus** (ATCC VR-3650). This product is fungicidal against the pathogenic fungus, Trichophyton  mentagrophytes  (ATCC VR-3650). This product is fungicidal against the pathogenic fungus, Trichophyton  mentagrophytes  (ATCC VR-3650). This product is fungicidal against the pathogenic fungus, Trichophyton  mentagrophytes  (ATCC VR-3650). This product is fungicidal against the pathogenic fungus, Trichophyton  mentagrophytes  (ATCC VR-3650). This product is fungicidal against the pathogenic fungus, Trichophyton  mentagrophytes  (ATCC VR-3650). This product is fungicidal against the pathogenic fungus, Trichophyton  mentagrophytes  (ATCC VR-3650).

**FUNGICIDAL ACTIVITY:**

This product kills on hard, non-porous inanimate surfaces when allowed to remain wet for a contact time of **3 minutes**.

**MEASURES TO BE TAKEN PRIOR TO USING IN THE PRESENCE OF ORGANIC SOIL (5% BLOOD SERUM).**

**EFFICACY TESTS HAVE DEMONSTRATED THAT THIS PRODUCT IS AN EFFECTIVE BACTERICIDE, FUNGICIDE, and VIRUCIDE IN THE PRESENCE OF ORGANIC SOIL (5% BLOOD SERUM).**

**CLEANING PROCEDURES:**

Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of the product.

- **Contact Time:** 1 minute for HIV and HBV and 3 minutes for HBV. For HIV-1/2 minute for HIV-1. These contact times result in the inactivation of HIV-1/2, HIV-1, and HIV-1/2 on surfaces.

**PRINCIPAL INGREDIENTS:**

- n-Alkyl (68% C12, 32% C14) dimethyl benzyl ammonium chlorides..........................0.105%
- Alkyl dimethyl benzyl ammonium chloride..........................0.105%
- Ethanol (ethyl alcohol)..........................70.000%
- Distilled water..........................29.000%

**INDICATOR CHEMICALS:**

Dihydroxyethyl ammonium chloride..........................0.100%

**TOTAL CONTENTS:**

100.000%
