ACTIVE INGREDIENT
Potassium sorbate............................................................45.0%

INERT INGREDIENTS
Water, Urea, Citric acid....................................................55.0%
Total..............................................................................100.00%

This product has not been registered by the U.S. EPA. Oro Agri, Inc represents that this product qualifies for exemption from registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), Section 25B.

KEEP OUT OF REACH OF CHILDREN

CAUTION/PRECAUCIÓN
Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.
(In if you do not understand the label, find someone to explain it to you in detail.)

HAZARD & PRECAUTIONARY STATEMENTS: Wear eye protection and chemical resistant protective gloves. Wash hands thoroughly after handling. Do not eat, drink or smoke when using this product.

FIRST AID
Call a POISON CENTER or doctor/physician if you feel unwell.
For Chemical Emergency (spill, leak, fire or accident), call CHEMTREC (800) 424-9300
IF SWALLOWED: Rinse mouth with plenty of water. IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.
GENERAL INFORMATION
TYPHOON® is a contact fungicide for field and greenhouse applications. Direct contact with the target organism is required for optimal control. Ensure application covers both sides of leaves. TYPHOON can be used in a disease resistance management program, rotating with fungicides having different modes of action. TYPHOON can also be used for late season disease infections when other fungicides may be limited due to pre-harvest interval restrictions.

RESTRICTED ENTRY INTERVAL: After a TYPHOON application, you may re-enter the area when the spray is dry.
PRE-HARVEST INTERVAL: TYPHOON can be applied up through harvest except where otherwise stated in the application rate comments.

DIRECTIONS FOR USE
Apply TYPHOON as a foliar treatment at the application rates listed below. TYPHOON must be applied with ATTITUDE™ acidifier at a rate equal to the TYPHOON rate (1:1 ratio). Read the ATTITUDE label before mixing. For maximum effectiveness, apply TYPHOON at the first sign of disease. Spray intervals should be shortened if rain occurred within 48 hours after application or during fast growing stages to protect newly developed leaf or fruit surfaces. Use shorter intervals when conditions are favorable for disease development or when high disease incidence is observed.

MIXING
Always clean tank, pump, and lines thoroughly before and after use. For best results, first add ATTITUDE to the spray solution while agitating. Then add water to fill the tank to 90% of final volume. Gradually add TYPHOON to the tank mix. Maintain agitation until spraying is completed. Spray until the tank is empty. Do not allow spray solution to sit overnight.

COMPATIBILITY
Test the tank mix compatibility, efficacy and crop sensitivity of a new tank mix combination before widespread use. TYPHOON is not compatible with alkaline chemicals or products that require a solution pH higher than 5, for example copper or potassium bicarbonate-based fungicides. Do not apply within 14 days after the last copper fungicide application. Do a jar test on all new tank mix combinations. Do not add any additional adjuvants.

DILUTION TABLE to make a 1% solution:

<table>
<thead>
<tr>
<th>Application volume per acre or per tank</th>
<th>25 gal</th>
<th>50 gal</th>
<th>100 gal</th>
</tr>
</thead>
<tbody>
<tr>
<td>32 fl.oz.</td>
<td>64 fl.oz.</td>
<td>128 fl.oz.</td>
<td></td>
</tr>
</tbody>
</table>
**APPLICATION RATES**

* Rate (% v/v) indicates the required concentration of TYPHOON. An equal volume of ATTITUDE acidifier must be added to the spray water before adding the TYPHOON. See DIRECTIONS FOR USE and MIXING instructions above.

<table>
<thead>
<tr>
<th>CROP</th>
<th>PESTS</th>
<th>TYPHOON Rates (% v/v)</th>
<th>COMMENTS</th>
</tr>
</thead>
</table>
| **Grapes**  
(Table, wine, raisin and juice) | Powdery Mildew (*Erysiphe necator*)  
Downy Mildew (*Plasmopara viticola*)  
Sour rot disease complex | 1% | Start application as soon as the first visual symptoms are observed and repeat every 7-10 days. When conditions are favorable for downy mildew development during pre-flowering through fruit set stages it is advisable to use TYPHOON in an integrated program with a residual contact or systemic product registered for downy mildew. Do not apply TYPHOON to wine grapes within 7 days of harvest. |
| **Cucurbits**  
including but not limited to melons, squashes, pumpkins, cucumbers | Powdery mildew (*Podosphaera xanthii*)  
White fly – suppression only | 1% | Start application as soon as the first visual symptoms are observed and repeat every 5-7 days. Ensure thorough coverage on the underside of leaves. Where white flies are present during application, suppression can be expected. |
| **Roses** | Powdery mildew (*Podosphaera pannosa*)  
White fly – suppression only | 1% | Start application as soon as the first visual symptoms are observed and repeat every 5-10 days. Some rose varieties and those grown in greenhouses may be sensitive to the spray mixture and should be tested before applying on a large scale. Where white flies are present during application, suppression can be expected. |
| **Stone fruit, pome fruits and nuts**  
including but not limited to peaches, nectarines, cherries, apples, pistachios, pecans | Powdery mildew:  
(*Podosphaera spp.*)  
(*Erysiphe pistaciae*)  
(*Microsphaera penicillata*) | 1% | Start application as soon as the first visual symptoms are observed and repeat every 7-10 days. |
### STORAGE AND DISPOSAL

Do not contaminate ponds, waterways, ditches and food or feed by storage or disposal. Store in original container in a well-ventilated place away from children and pets. Dispose of contents/container in accordance with local/regional/national/international regulations.

### CONDITIONS OF SALE-LIMITED WARRANTY AND LIMITATIONS OF LIABILITY AND REMEDIES

To be read prior to using this product. The directions should be followed carefully together with good application practice. Failure to do so may cause injury to crops, animals, man or the environment. Extraordinary or unusual weather conditions may affect product performance and/or crop injury which are beyond the control of Oro Agri, Inc. (the “Company”) or seller. The Company warrants that this product conforms to the chemical description on the label and is reasonably fit for the purpose referred to in the Directions For Use. The Company makes no other warranties or representations of any kind, express or implied, concerning the product, including no implied warranty of merchantability or fitness for any particular purpose, and no such warranty shall be implied by law. The exclusive remedy against the Company for any cause of action relating to the handling or use of this product shall be limited to, at Company’s election, ONE of the following: 1. Refund of the purchase price paid by buyer or user for product bought. 2. Replacement of the product used. To the extent allowed by law, the Company shall not be liable and any and all claims against the Company are waived for special, indirect, incidental, or consequential damages or expense of any nature, including, but not limited to, loss of profits or income. The Company/seller offer this product and the buyer/user accepts it, subject to the foregoing conditions of sale and limitation of warranty, liability and remedies.
