# METH-O-GAS® 100

**COMMODITY FUMIGANT**

**ACTIVE INGREDIENTS:** Methyl bromide .......................... 100%

This product weighs 14.4 pounds per gallon.

**KEEP OUT OF REACH OF CHILDREN**

**DANGER • PELIGRO • POISON**

Si Usted no entiende la etiqueta, busque a alguien para que se la explique a Usted en detalle. (If you do not understand the label, find someone to explain it to you in detail).

## HOT LINE NUMBER

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-949-5187 for emergency treatment information.

## NOTE TO PHYSICIAN

Early symptoms of overexposure are dizziness, headache, nausea and vomiting, weakness and collapse. Lung edema may develop in 2 to 48 hours after exposure, accompanied by cardiac irregularities; these effects are the usual cause of death. Repeated overexposures can result in blurred vision, staggering gait and mental imbalance, with probable recovery after a period of no exposure. Blood bromide levels suggest the occurrence, but not the degree, of exposure. Treatment is symptomatic.

SEE SIDE PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS

Packed for:

Great Lakes

CHEMICAL CORPORATION

P.O. BOX 2200 • WEST LAFAYETTE, INDIANA 47906-2200 • U.S.A.
WARNING: Contains methyl bromide, a substance which harms public health and environment by destroying ozone in the upper atmosphere.
PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS
DANGER
Extremely hazardous liquid and vapor under pressure. Liquid or vapor can cause serious skin or eye injury which may have a delayed onset. Do not get liquid on skin, in eyes or on clothing.

Do not breathe vapor. Inhalation may be fatal or cause serious acute illness or delayed lung or nervous system injury. Methyl bromide vapor is odorless and insidious to skin and eyes during exposure. Exposure to toxic levels may occur without warning or detection by the user.

Note to Physician. Early symptoms of overexposure are dizziness, headache, nausea and vomiting, weakness and collapse. Lung edema may develop in 2 to 48 hours after exposure, accompanied by cardiac irregularities; these effects are the usual cause of death. Repeated overexposures can result in blurred vision, slurring of speech, and mental impairment, with possible recovery after a period of no exposure. Blood bromide levels suggest the occurrence, but not the degree, of exposure. Treatment is symptomatic.

AIR CONCENTRATION LEVEL
The acceptable air concentration level for persons exposed to methyl bromide is 5 ppm (20 mg/m³). The air concentration level is measured by a direct reading detection device, such as a Matheson-Kligawa, Draeger, or Sensidyne.

AERATION AND REENTRY
After fumigation, treated areas must be aerated until the level of methyl bromide is 5 ppm or less. Do not allow entry into the treated area by any person before this time, unless protective clothing and a respiratory protection device (NIOSH/MSHA approved self-contained breathing apparatus (SCBA) or combination air-supplied/SCBA respirator) is worn.

PERSONAL PROTECTIVE EQUIPMENT (PPE)
Applicators and other handlers must wear:
Loose-fitting or well ventilated long-sleeved shirt and long pants.
Shoes and socks.
Full-face shield or safety glasses with brow and temple shields. (Do NOT wear goggles.) When the acceptable air concentration level is above 5 ppm and a respirator is required, protect the eyes by wearing a full-face respirator.

No respirator is required if the acceptable air concentration level of methyl bromide in the working area is measured to be 5 ppm or less.

A respirator is required if the acceptable air concentration level of methyl bromide is exceeded at any time. The respirator must be one of the following types: (a) a supplied-air respirator (MSHA/NIOSH approval number prefix TC-19C) OR (b) a self-contained breathing apparatus (SCBA) (MSHA/NIOSH approval number prefix TC-19F).

ENVIRONMENTAL HAZARDS
This product is toxic to fish and wildlife. Keep out of lakes, streams and ponds. Do not contaminate water by cleaning of equipment or disposal of wastes.

SPILL AND LEAK PROCEDURES, Evacuate immediate area of spill or leak. Use a NIOSH/MSHA approved self-contained breathing apparatus (SCBA) or combination air-supplied/SCBA respirator for entry into spill area to correct problem. Allow spill to evaporate. Do not permit entry into spill area by persons without appropriate respiratory protection until concentration of methyl bromide is determined to be 5 ppm or less. Remove leaking containers to an isolated area and cover with polyethylene sheeting of 0.1 mm or greater thickness. Seal by placing the outside edges of sheeting in a trench and cover with soil. Tank soil down so edges will not pull loose. Discharge the contents under the sheeting and do not disturb for at least 48 hours.

Contaminated soil, water, and other cleanup debris is a toxic hazardous waste. Report spill to the National Response Center (800-424-8802) if the reportable quantity of 1000 lbs. is exceeded.

PHYSICAL AND CHEMICAL HAZARDS
Content under pressure. Do not use or store near heat or open flame. In the event of a leak, the material is highly flammable. Meth-

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This fungicide is a highly hazardous material and should be used only by individuals trained in its proper use. Before using, read and follow all label precautions and directions.

All persons working with this fungicide must be knowledgeable about the hazards, and trained in the use of required respirator protection equipment and detector devices, emergency procedures, and proper use of the fungicide.

STORAGE, HANDLING AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal. Storage and handling of Cylinders. Store in a secure manner either outdoors under ambient conditions or indoors in a well-ventilated area. Post as a pesticide storage area.

Store cylinders upright, secured to prevent tipping, as allowed by design.

Cylinders should not be subjected to rough handling or mechanical shock such as dropping, bumping, dragging, or sliding. Do not use rope slings, hooks, togs or similar devices to unload cylinders. Transport cylinders using hand truck, fork truck or other device to which the cylinder can be firmly secured. Do not remove valve protection bonnet and safety cap until immediately before use. Replace safety cap and valve protection bonnet when cylinder is not in use.

When cylinder is empty, close valve, screw safety cap onto valve outlet, and replace protection bonnet before returning. Only the registrant, or his designated, is authorized to refill cylinders. Do not use cylinders for any other purpose.

Disposal of Pesticide. Pesticide wastes are toxic. Improper disposal of excess pesticide is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office of guaranty.

Disposal of Cylinders. To insure proper return of empty or partial cylinders, make return shipping arrangements with the seller of the product.

PRODUCT IS TO BE USED for control of pests in stored or residual food products, agricultural commodities and other materials and products as specified on this label. This product is to be used for these purposes ONLY IN: (a) enclosed spaces and structures that are intended or used for processing, transportation, handling, or storage of food products, agricultural commodities or other materials and products on this label; (b) enclosed spaces and structures in which food products, agricultural commodities, or other materials and products identified on this label have been processed, transported, handled or stored; and, when this product is used for the foregoing purposes, (c) associated storage areas, work areas, and food service facilities (such as employee cafeterias and test kitchens). DO NOT USE THIS PRODUCT IN residential structures or in food service facilities (such as public restaurants) other than those described above, or for any purposes other than those described above.

If you have any questions about the proper use of this product, you should contact Great Lakes Chemical Corporation at 1-800-378-9451 before using this product.

This fungicide is a highly hazardous material and should be used only by individuals trained in its proper use. You must carefully read and understand the accompanying use directions, GLK 159, in order to use METH-0-GAS® 100. Observe all safety and precautionary statements as set forth in the accompanying use directions, GLK 159. All fumigation directions, including dosage rates, exposure times and reentry periods are given in the accompanying use directions, GLK 159.

STATEMENT OF WARRANTY AND LIABILITY
The directions for use of this product are believed to be adequate and should be followed carefully.

Seller warrants that this product complies with the specifications expressed in this label and GLK 159. SELLER MAKES NO OTHER WARRANTIES, AND DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY AND FITNESS FOR THE INTENDED PURPOSE. Seller’s liability for default, breach, or failure under this label shall be limited to the amount of the purchase price. Seller shall have no liability for consequential damages.

Many pesticidal chemicals are poisonous and may leave a toxic residue on the plants to which they are applied. The U.S. Environmental Protection Agency has established maximum amounts of such pesticidal chemicals that may remain on raw agricultural products, and it is the user’s responsibility to see that there is no residue on such crops in excess of these amounts. The “Directions for Use” are based on the best available information, and it followed carefully should not leave excessive residues. However, Great Lakes Chemical Corporation assumes no responsibility as to their accuracy nor for any loss due to excessive residues.

NET WT.

LOT NUMBER
MOG100-19 REV. F
STATEMENT OF WARRANTY AND LIABILITY

The directions for use of the products are believed to be adequate and should be followed exactly.

Some hazards: that the product complete with the special hardware is repressed in this type, that the user understands and agrees to be bound by the warranty terms and conditions, and that the user is responsible for any damages or losses that may occur as a result of the use of the product.

The buyer's warranty is limited to the warranty of the product, and the buyer assumes all risk of loss or damage that may occur as a result of the use of the product. The buyer also agrees to indemnify and hold harmless the manufacturer from any liability or damages that may occur as a result of the use of the product.

WARRANTY STATEMENTS

HAZARD

Evidently, hazardous liquid and vapor pose enormous risks. Liquid or vapor can cause serious injury or death by burning or inhalation. Do not handle these materials without proper protective gear.

HAZARD LEVEL

The concentration of hazardous materials can be reduced by proper handling and storage practices. It is important to follow all manufacturer's instructions and to use proper protective equipment when handling these materials.

PRECAUTIONS

All users are required to use a self-contained breathing apparatus (SCBA) when entering an enclosed space or when working in an environment where oxygen levels may be reduced.

READINESS

The user is required to wear a self-contained breathing apparatus (SCBA) at all times when entering an enclosed space or when working in an environment where oxygen levels may be reduced.

ENVIRONMENTAL HAZARDS

This product is toxic to bird and wildlife. Extricate all of the product from the area, taking care not to spill or contaminate the water.

SPILL AND LEAK PRECAUTIONS

Evaluate immediate area of spill or leak to determine the source of the spill or leak. If the spill or leak is not controlled, proceed with the following steps:

1. Isolate the area and remove all potential sources of contamination.
2. Secure the area and initiate the appropriate cleanup procedures.

SAFETY RECOMMENDATIONS

- Wash hands before eating, drinking, smoking, putting on/ taking off clothing, or using the toilet.
- Wash hands immediately after handling any objects that may be contaminated with hazardous materials.

FIRST AID

- If exposure occurs, seek immediate medical attention. Call 911 or other emergency number.
- If exposure occurs, seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR INHALATION

- Remove from the area and seek immediate medical attention.
- If exposure occurs, seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR SKIN EXPOSURE

- Remove contaminated clothing and wash affected area with soap and water for at least 15 minutes.
- If exposure occurs, seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR EYE EXPOSURE

- Lift eyelids and flush with running water for at least 15 minutes. If exposure occurs, seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR INHALATION

- Remove from the area and seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR SKIN EXPOSURE

- Remove contaminated clothing and wash affected area with soap and water for at least 15 minutes. If exposure occurs, seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR EYE EXPOSURE

- Lift eyelids and flush with running water for at least 15 minutes.
- If exposure occurs, seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR INHALATION

- Remove from the area and seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR SKIN EXPOSURE

- Remove contaminated clothing and wash affected area with soap and water for at least 15 minutes.
- If exposure occurs, seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR EYE EXPOSURE

- Lift eyelids and flush with running water for at least 15 minutes.
- If exposure occurs, seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR INHALATION

- Remove from the area and seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR SKIN EXPOSURE

- Remove contaminated clothing and wash affected area with soap and water for at least 15 minutes.
- If exposure occurs, seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR EYE EXPOSURE

- Lift eyelids and flush with running water for at least 15 minutes.
- If exposure occurs, seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR INHALATION

- Remove from the area and seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR SKIN EXPOSURE

- Remove contaminated clothing and wash affected area with soap and water for at least 15 minutes.
- If exposure occurs, seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR EYE EXPOSURE

- Lift eyelids and flush with running water for at least 15 minutes.
- If exposure occurs, seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR INHALATION

- Remove from the area and seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR SKIN EXPOSURE

- Remove contaminated clothing and wash affected area with soap and water for at least 15 minutes.
- If exposure occurs, seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR EYE EXPOSURE

- Lift eyelids and flush with running water for at least 15 minutes.
- If exposure occurs, seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR INHALATION

- Remove from the area and seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR SKIN EXPOSURE

- Remove contaminated clothing and wash affected area with soap and water for at least 15 minutes.
- If exposure occurs, seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR EYE EXPOSURE

- Lift eyelids and flush with running water for at least 15 minutes.
- If exposure occurs, seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR INHALATION

- Remove from the area and seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR SKIN EXPOSURE

- Remove contaminated clothing and wash affected area with soap and water for at least 15 minutes.
- If exposure occurs, seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR EYE EXPOSURE

- Lift eyelids and flush with running water for at least 15 minutes.
- If exposure occurs, seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR INHALATION

- Remove from the area and seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR SKIN EXPOSURE

- Remove contaminated clothing and wash affected area with soap and water for at least 15 minutes.
- If exposure occurs, seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR EYE EXPOSURE

- Lift eyelids and flush with running water for at least 15 minutes.
- If exposure occurs, seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR INHALATION

- Remove from the area and seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR SKIN EXPOSURE

- Remove contaminated clothing and wash affected area with soap and water for at least 15 minutes.
- If exposure occurs, seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR EYE EXPOSURE

- Lift eyelids and flush with running water for at least 15 minutes.
- If exposure occurs, seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR INHALATION

- Remove from the area and seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR SKIN EXPOSURE

- Remove contaminated clothing and wash affected area with soap and water for at least 15 minutes.
- If exposure occurs, seek immediate medical attention. Call 911 or other emergency number.

FIRST AID FOR EYE EXPOSURE

- Lift eyelids and flush with running water for at least 15 minutes.
- If exposure occurs, seek immediate medical attention. Call 911 or other emergency number.
